

Architectural Heat Strengthened Glass

Architectural heat strengthened glass introduction

Architectural Heat strengthened glass:

Processed by tempering oven through 670-720 degree heating and cool down with wind, but different from toughened, the cooling process is much slower.

Before process, monolithic glass can be enhanced:

- ◆ **Appearance enhancement:** Enhancement- Appearance
- ◆ **Color Enhancement:** Enhancement- Color
- ◆ **Performance Enhancement:** Enhancement-coating

Features:

- ◆ 2 times strength high than float glass.
- ◆ Radial shards after breaking, but can keep glass integrity
- ◆ No spontaneous breakage.

Applications:

QINGDAO MORN BUILDING MATERIALS CO.,LTD

Your turnkey China tempered glass/laminated glass/insulated glass supplier

As architectural heat strengthened glass has higher strength and no spontaneous breakage possibility, usually used in high rise buildings.

Production capability:

Glass	Thickness	Min Size	Max Size
Flat Heat Strengthened	2.5-12mm	300*300mm	10000*3300mm

Cases

China Morn Building Materials-Your Turnkey Architectural Glass Partner

Glass tempering-Special glass tempering
