The aluminum alloy folding door is a kind of horizontal moving by the upper and lower rails, and the sashes are folded and pushed to the side, and are composed of an aluminum alloy profile, a glass sashes, a transmission component, a rotating arm component, a transmission rod and an orientation device.

The Aluminium folding door effectively saves the space occupied by the door, and the simple push-pull action can easily play the role of blocking and freely separating the space, and has the excellent decorative effect of beautiful appearance, novel style and various colors.

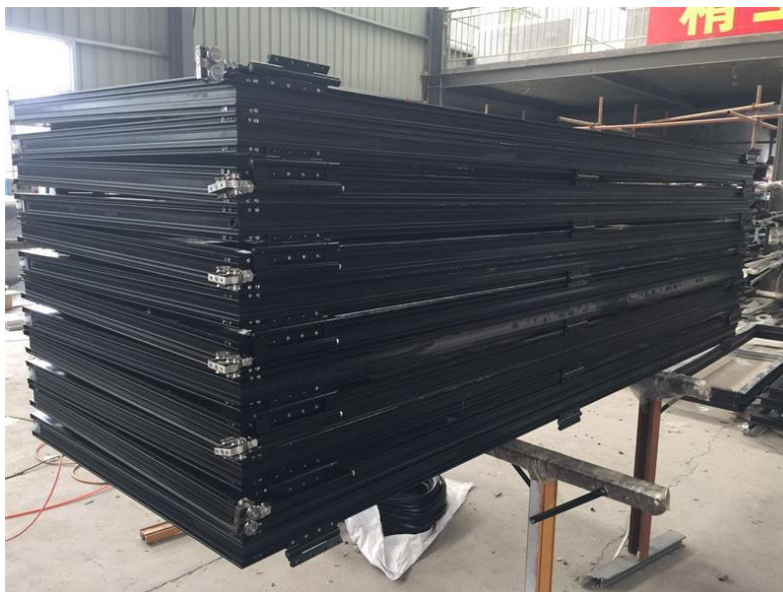

Aluminium Profile: 6063-T5 ,2.0mm thermal break aluminium alloy

Surface treatment: Powder coating, Anodized surface, PVDF coating, wood transfer coating

Glass: Max 30mm thick 5-20-5 insulated glass, optional laminated insulated, glass, low-E coated insulated glass.

Features: Sound insulation, environmental protection, durability, fire prevention, anti-theft, high water tightness, high hardness, good wind pressure resistance and flexible flexion. The high-end folding system hardware accessories are exquisite and generous, and the switch is smoother. The upper hanging rail + lower rail simultaneously has a stronger sliding bearing capacity.

Applications: high-end residential applications, small-sized houses, offices, exhibition halls, gardens, shops, courtyards and public places.
