

THE BENEFIT OF DOUBLE GLAZED UNITS FOR CURTAIN WALL

Top building glass curtain wall is generally with **insulated glass(double glazed units)**, glass is the most thin, easy to heat transfer in building external wall material.double glazed units with aluminum frame of desiccant through the gap above the aluminum frame that makes the air inside the insulated glass stay dry for a long time, with the excellent insulating performance.

High sound insulation: double glazed units can decline of 27-40 decibel noise, 80 decibel traffic noise outside the room, then only 50 decibels.

Eliminate the frost and dew: indoor and outdoor temperature difference is too big, single-layer glass frosting.double glazed units is due to contact with the indoor air inner glass is affected by the air interlayer, even if the outer contact is very low, also won't because of the difference in temperature condensation on the glass surface.Hollow glass dew point to -70°C (excluding rubber strip type insulating glass)

Wind pressure strength increase: curtain wall mainly under wind load, wind pressure resistance become the main indicators of curtain wall.Hollow glass wind pressure strength is 15 times of single piece of glass.

Morn is your turnkey China ,facade double glazed units supplier,welcome contact us for your glass curtain wall projects.

QINGDAO MORN BUILDING MATERIALS CO.,LTD

Your turnkey China tempered glass/laminated glass/insulated glass supplier

About Morn Building Materials:

Morn Building Materials Co.,Ltd is trading company offering the right facade materials for a wide range of applications for architectural,design and system requirements.Cooperating with China premium glass fabricators,Morn is able to supply whatever glass products applied in facade,Spandrel ,roof ,handrail,partition,balustrade,canopy,greenhouse,sun room ,interior exterior application.

Other facade materials:Aluminium alloy profiles,aluminium plates,aluminium windows&doors,Assa Abloy hardware,spider fitting,railing systems,shower rooms,polyurethane panels,machines&tools,steel structure, are also available since 2019.

From aesthetics, to strict environmental and energy specifications, to critical budget and delivery requirements, our input can make a difference.
